SAFETY GRANT IMPACT

A Safer Place to Play for Levi & Lukah

WARREN, Ohio — Summer 2026. Earlier this year, Willy's World awarded a $6,000 Safety Grant to help create a secure outdoor space for 4-year-old twins Levi and Lukah. Today, that project is complete, and the impact goes far beyond a new fence.

Both boys are diagnosed with autism and are at risk of elopement, making outdoor play difficult and stressful for their family. The completed safety fencing now gives Levi and Lukah a secure space where they can run, play, explore, and simply enjoy being kids. For their family, it provides something equally important: greater peace of mind.

SAFETY GRANT

$6,000

invested to create a secure outdoor space for two local children.

Safety Grants are an important part of Willy's World's mission because they provide practical solutions to challenges families face every day. For a child at risk of elopement, a secure fence is more than a home improvement. It is a critical safety measure that reduces risk while creating opportunities for greater independence and outdoor play.

Made possible by our donors, sponsors, and community supporters, this project shows what their generosity can accomplish: a safer place for Levi and Lukah to play, more freedom to explore, and greater peace of mind for their family.

Every child deserves a safe place to play.

For families affected by elopement and wandering, a secure yard is more than a fence. It provides safety, freedom, and peace of mind.
